

INDEX FOR VOLUME 48

Articles

- Arabie, Phipps (see Carroll, J. Douglas).
- Batagelj, Vladimir (see Ferligoj, Anuska).
- Bentler, Peter M. Some contributions to efficient statistics in structural models: specification and estimation of moment structures. 493–517.
- Bentler, Peter M. & Tanaka, Jeffrey S. Problems with algorithms for ML factor analysis. 247–252.
- Braun, Henry, Jones, Douglas H., Rubin, Donald B. & Thayer, Dorothy T. Empirical Bayes estimation of coefficients in the general linear model from data of deficient rank. 171–182.
- Brokken, Frank B. Orthogonal procrustes rotation maximizing congruence. 343–352.
- Brown, C. Hendricks. Asymptotic comparison of missing data procedures for estimating factor loadings. 269–292.
- Carroll, J. Douglas & Arabie, Phipps. INDCLUS: An individual differences generalization of the ADCLUS model and the MAPCLUS algorithm. 157–170.
- Carroll, J. Douglas (see De Soete, Geert).
- Cooper, Lee G. & Nakanishi, Masao. Two logit models for external analysis of preferences. 607–620.
- Cressie, Noel & Holland, Paul W. Characterizing the manifest probabilities of latent trait models. 129–142.
- De Soete, Geert & Carroll, J. Douglas. A maximum likelihood method for fitting the wandering vector model. 553–566.
- Etezadi-Amoli, Jamshid & McDonald, Roderick P. A second generation nonlinear factor analysis. 315–342.
- Feldt, Leonard S. (see Gilmer, Jerry S.)
- Ferligoj, Anuska & Batagelj, Vladimir. Some types of clustering with relational constraints. 541–552.
- Fischer, Gerhard H. Logistic latent trait models with linear constraints. 3–26.
- Gilmer, Jerry S. & Feldt, Leonard S. Reliability estimation for a test with parts of unknown lengths. 99–112.
- Gross, Alan L. & Perry, Philippa. Validating a selection test, a predictive probability approach. 113–128.
- Holland, Paul W. (see Cressie, Noel)
- Ihara, Masamori (see Okamoto, Masashi)
- Jarjoura, David. Best linear prediction of composite universe scores. 525–539.
- Jones, Douglas H. (see Braun, Henry)
- Lord, Frederic M. Statistical bias in maximum likelihood estimators of item parameters. 425–436.
- Lord, Frederic M. Unbiased estimators of ability parameters, of their variance, and of their parallel-forms reliability. 233–246.
- MacCallum, Robert. A comparison of factor analysis programs in SPSS, BMDP, and SAS. 223–232.
- MacKay, David B. (see Zinnes, Joseph L.)
- McDonald, Roderick P. Alternative weights and invariant parameters in optimal scaling. 377–392.
- McDonald, Roderick P. (see Etezadi-Amoli, Jamshid)
- Molenaar, Ivo W. Some improved diagnostics for failure of the Rasch Model. 49–72.
- Nakanishi, Masao (see Cooper, Lee G.)
- Okamoto, Masashi & Ihara, Masamori. A new algorithm for the least-squares solution in factor analysis. 597–605.
- Perry, Philippa (see Gross, Alan L.)
- Ramsay, James O. (see Winsberg, Suzanne)
- Rigdon, Steven E. (see Tsutakawa, Robert K.)
- Rindskopf, David. A general framework for using latent class analysis to test hierarchical and nonhierarchical learning models. 85–98.
- Rindskopf, David. Parameterizing inequality constraints on unique variances in linear structural models. 73–84.
- Robinson, D. H. (see Wackerly, D. D.)
- Rubin, Donald B. & Thayer, Dorothy T. More on EM for ML factor analysis. 253–258.
- Rubin, Donald B. (see Braun, Henry)
- Samaniego, Francisco J. & Utts, Jessica M. Evaluating performance in continuous experiments with feedback to subjects. 195–210.
- Sergent, Justine (see Takane, Yoshio)
- Stegelmann, Werner. Expanding the Rasch Model to a general model having more than one dimension. 259–268.
- Takane, Yoshio & Sergent, Justine. Multidimensional scaling models for reaction times and same-different judgements. 329–424.
- Tanaka, Jeffrey S. (see Bentler, Peter M.)
- Ten Berge, Jos M. F. A generalization of Kristof's theorem on the trace of certain matrix products. 519–523.
- Ten Berge, Jos M. F. On Green's best linear composites with a specified structure, and oblique estimates of factor scores. 371–376.

- Thayer, Dorothy T. Maximum likelihood estimation of the joint covariance matrix for sections of tests given to distinct samples with application to test equating. 293–298.
- Thayer, Dorothy T. (see Braun, Henry)
- Thayer, Dorothy T. (see Rubin, Donald B.)
- Thomas, D. Roland. Univariate repeated measures techniques applied to multivariate data. 451–464.
- Tsutakawa, Robert K. & Rigdon, Steven E. Parameter estimation in latent trait models. 567–574.
- Utts, Jessica M. (see Samaniego, Francisco J.)
- Vijn, Pieter. Ordinal data, ordered scale points, and order statistics. 437–450.
- Wackerly, D. D. & Robinson, D. H. A more powerful method for testing for agreement between a judge and a known standard. 183–194.
- Wilcox, Rand R. An approximation of the K out N reliability of a test, and a scoring procedure for determining which items an examinee knows. 211–222.
- Winsberg, Suzanne & Ramsay, James O. Monotone spline transformations for dimension reduction. 575–595.
- Yen, Wendy M. Tau-equivalence and equipercntile equating. 353–370.
- Zinnes, Joseph L. & MacKay, David B. Probabilistic multidimensional scaling: complete and incomplete data. 27–48.

Notes and Comments

- Bentler, P. N. & Freeman, Edward H. Tests for stability in linear structural equation systems. 143–146.
