

INDEX FOR VOLUME 58

Articles

- Arnold, Barry C., Beaver, Robert J., Groeneveld, Richard A., & Meeker, William Q. *The nontruncated marginal of a truncated bivariate normal distribution*. 471-488.
- Ashby, F. Gregory. (see Ennis, Daniel M.)
- Bartholomew, D. J. (see Knott, M.)
- Beaver, Robert J. (see Arnold, Barry, C.)
- Böckenholt, Ulf. *Estimating latent distributions in recurrent choice data*. 489-509.
- Chang, Hua-Hua & Stout, William. *The asymptotic posterior normality of the latent trait in an IRT model*. 37-52.
- Cudeck, Robert, Klebe, Kelli J., & Henly, Susan J. *A simple Gauss-Newton procedure for covariance structure analysis with high-level computer languages*. 211-232.
- De Soete, Geert. (see Winsberg, Suzanne)
- De Soete, Geert & Heiser, William J. *A latent class unfolding model for analyzing single stimulus preference ratings*. 545-565.
- De Soete, Geert & Winsberg, Suzanne. *A Thurstonian pairwise choice model with univariate and multivariate spline transformations*. 233-256.
- de Vries, Han. *The rowwise correlation between two proximity matrices and the partial rowwise correlation*. 53-69.
- DeSarbo, Wayne S. (see Jedidi, Kamel)
- Dzhafarov, Ehtibar N. *Grice-representability of response time distribution families*. 281-314.
- Ellis, Jules L. & van den Wollenberg, Arnold L. *Local homogeneity in latent trait models: A characterization of the homogeneous monotone IRT model*. 417-429.
- Ennis, Daniel M. & Ashby, F. Gregory. *The relative sensitivities of same-different and identification judgment models to perceptual dependence*. 257-279.
- Fagot, Robert F. *A generalized family of coefficients of relational agreement for numerical scales*. 357-370.
- Glas, C. A. W. (see Verhelst, N. D.)
- Groeneveld, Richard A. (see Arnold, Barry C.)
- Heiser, Willem J. (see De Soete, Geert)
- Heiser, Willem J. (see Zielman, Berrie)
- Henly, Susan J. (see Cudek, Robert)
- Ishizuka, Tomoichi. (see McDonald, Roderick P.)
- Jedidi, Kamel, Ramaswamy, Venkatram, & DeSarbo, Wayne S. *A maximum likelihood method for latent class regression involving a censored dependent variable*. 375-394.
- Kiers, Henk A. L. (see ten Berge, Jos M. F.)
- Kiers, Henk A. L. & Takane, Yoshio. *Constrained DEDICOM*. 339-355.
- Kiers, Henk A. L., Takane, Yoshio, & Mooijaart, Ab. *A monotonically convergent algorithm for FACTALS*. 567-574.
- Kim, Jwa K. & Nicewander, W. Alan. *Ability estimation for conventional tests*. 587-599.
- Klebe, Kelli J. (see Cudeck, Robert)
- Knott, M. & Bartholomew, D. J. *Constructing measures with maximum reliability*. 331-338.
- Maris, Eric. *Additive and multiplicative models for gamma distributed random variables, and their application as psychometric models for response times*. 445-469.
- Masters, Geoffrey N. (see Wilson, Mark)
- McDonald, Roderick P. *A general model for two-level data with responses missing at random*. 575-574.
- McDonald, Roderick P., Parker, Prudence M., & Ishizuk, Tomoichi. *A scale-invariant treatment for recursive path models*. 431-443.
- Meeker, William Q. (see Arnold, Barry C.)
- Mendoza, Jorge L. *Fisher Transformations for correlations corrected for selection and missing data*. 601-615.
- Meredith, William. *Measurement invariance, factor analysis and factorial invariance*. 525-543.
- Meulman, Jacqueline J. & Verboon, Peter. *Points of view analysis revisited: Fitting multidimensional structures to optimal distance components with cluster restrictions on the variables*. 7-35.
- Mislevy, Robert J. *Should "multiple imputations" be treated as "multiple indicators"?* 79-85.
- Mooijaart, Ab. (see Kiers, Henk A. L.)
- Nicewander, W. Alan. (see Kim, Jwa K.)
- Nishisato, Shizuhiko. *On quantifying different types of categorical data*. 617-629.
- Parker, Prudence M. (see McDonald, Roderick P.)
- Ramaswamy, Venkatram. (see Jedidi, Kamel)
- Samejima, Fumiko. *An approximation for the bias function of the maximum likelihood estimate of a latent variable for the general case where the item responses are discrete*. 119-138.

- Samejima, Fumiko. *The bias function of the maximum likelihood estimate ability for the dichotomous response level*. 195–209.
- Shealy, Robin & Stout, William. *A model-based standardization approach that separates true bias/DIF from group ability differences and detects test bias/DTF as well as item bias/DIF*. 159–194.
- Stout, William. (see Chang, Hua-Hua)
- Stout, William. (see Shealy, Robin)
- Takane, Yoshio. (see Kiers, Henk A. L.)
- Takane, Yoshio. (see Kiers, Henk A. L.)
- ten Berge, Jos M. F. & Kiers, Henk A. L. *An alternating least squares method for the weighted approximation of a symmetric matrix*. 115–118.
- van den Wollenberg, Arnold L. (see Ellis, Jules L.)
- Verboon, Peter. (see Meulman, Jacqueline J.)
- Verhelst, N. D. & Glas, C. A. W. *A dynamic generalization of the Rasch model*. 395–415.
- Wilcox, Rand R. *Comparing one-step M-estimators of location when there are more than two groups*. 71–78.
- Wilson, Mark & Masters, Geoffrey N. *The partial credit model and null categories*. 87–99.
- Winsberg, Suzanne. (see De Soete, Geert)
- Winsberg, Suzanne & De Soete, Geert. *A latent class approach to fitting the weighted Euclidean model, CLASCAL*. 315–330.
- Zielman, Berrie & Heiser, Willem J. *Analysis of asymmetry by a slide-vector*. 101–114.

Notes and Comments

- Nicewander, W. Alan. *Some relationships between the information function of IRT and the signal/noise ratio and reliability coefficient of classical test theory*. 139–141.

Computing Announcements

- Godbout, Robert C. (see Malitz, David)
- Jacoby, William G. *A SAS macro for calculating the line-of-sight measurement of interobject dissimilarity*. 511–512.
- Malitz, David & Godbout, Robert C. *PC-Group: A classification analysis program*. 143.

Reviews

- Boik, Robert J. Review of *Three-Way Methods for the Analysis of Qualitative and Quantitative Two-Way Data* by Henk A. L. Kiers. 149–152.
- Jansen, Margo G. H. Review of *Ability, Partial Information, Guessing: Statistical Modelling Applied to Multiple-Choice Tests* by T. P. Hutchinson. 513–514.
- Marsh, Herbert W. Review of *Evaluation of Measurement by Meta-Analysis of Multitrait Multimethod Studies* by W. E. Saris and A. van Meurs. 145–148.
- Shanmugam, Ramalingam. Review of *Exploratory Linear Dynamic Systems Analysis* by Carrien C. J. H. Bijleveld. 515–516.
