

**Position:**

This is a contract position responsible for designing a series of education test blueprints aligned at the skill level, conducting field testing, item bank calibration, alignment review and test creation. Curriculum Advantage is seeking to develop a series of K-12 solutions based assessments including, but not limited to, Universal Screeners for RtI, Readiness tests, Learning Styles inventory, Diagnostic tests, Formative tests, Benchmark tests, Summative tests, End of Course exams and Ad Hoc tests. As with our flagship product Classworks, our assessments will be web based. The user interface for the creation, assignment, review and reports will be the same as the user interface for assignment, review and reports of students and classroom assignments in Classworks. The use of assessments will be integrated into Classworks, as well as available for use as a stand alone product.

Curriculum Advantage is creating the test bank items for the project. Items will be written to the lowest level of our instructional unit hierarchy with emphasis on higher order cognitive levels. Items will be grade level specific and aligned to Classworks Instructional units and NAEP; as well as State Standards, State Test Objectives and School Pacing Guides.

This position will not include item bank creation. However, the position will require expertise in item bank analysis. This will include an alignment review by grade level, cognitive level and alignment to national and state standards.

**Request:**

Curriculum Advantage is requesting information, timelines and cost estimates on the following activities:

Test Blueprint  
Field Testing  
Item Bank Calibration  
Alignment Review  
Creation of meaningful cut points  
Test Creation
