

Psychometrician

Location

St. Paul, MN

Salary

\$82,500

Education Requirements

A Masters degree or PhD in Psychometrics, Industrial Psychology or a closely related field is strongly encouraged, or an equivalent combination of education and experience from which comparable knowledge and skills can be acquired. Knowledge of and experience with database software (e.g., ACCESS, ORACLE, etc.) is strongly encouraged. In addition, knowledge of user-oriented software including word processing software (e.g., Word, WordPerfect), spreadsheets (e.g., LOTUS, QUATTRO, EXCEL), statistical packages (e.g., SAS, SPSS), as well as knowledge of generalized proprietary software is desired.

Details

The Psychometrician will provide statistical analysis support for test development. The duties include: determining the appropriate psychometric theory, software, and procedures to develop psychometrically sound exams. Duties also include generating reports, running psychometric analysis reports in SPSS, SAS or Intelitest (proprietary software), designing and developing reports, providing quality control checks of data analyses and reports, and providing general research and analysis expertise to business units.
