

Outcomes Research Analyst

QualityMetric seeks an Outcomes Research Analyst for our Lincoln, RI corporate site to support the scientific development of our world-class health assessment products.

QualityMetric Incorporated is a leading provider of health status and outcomes measurement products and services that use proprietary and analytical methodologies to capture, benchmark, and interpret actionable patient-reported health information. The validity, precision, versatility, and utility of QualityMetric's comprehensive product portfolio have made our surveys the most accurate and widely used PRO measurement tools in the health care market. In addition to providing the initial assessment of an individual's health status, our surveys can evaluate treatment effectiveness, differentiate between outcomes produced by a wide range of treatments, enable evaluation of treatment benefits in relation to health costs and utilization of services, and meaningfully engage the consumer in the health care process.

At QualityMetric, we support a vibrant, participatory environment that nurtures individual growth, celebrates diversity, encourages initiative, values teamwork, and rewards excellence. We aim to make working at QM an energizing and fulfilling experience. We want our employees to be positive and enthusiastic about what they are doing, with a clear sense of purpose and pride in their individual contribution to the company's success.

Responsibilities:

- Participates in the conduct of patient-based outcomes research (e.g., health-related quality of life (HRQOL), functional status assessment, disability, satisfaction, etc.), for research grants, product development projects, and/or consulting projects
- Researches periodicals, literature, documents, newspapers and statistical records to obtain data.
- Evaluates and summarizes data from literature searches (e.g., extracts data; conducts content analyses)
- Manages large data sets, evaluates data quality, conducts statistical programming to analyze data, and interprets results
- Prepares technical reports, summaries, protocols; and documents results from quantitative and qualitative analyses
- Prepares for and presents at professional meetings and client-sponsored events; and prepares and publishes associated abstracts
- Works with the research staff to ensure that projects are completed in a timely fashion and in accordance with quality standards
- Interacts effectively and collegially with all employees at QM, fostering a supportive and cross departmental sharing environment

Qualifications:

- MA in measurement, quantitative psychology, statistics or related field preferred; BA or BSc and commensurate experience may be considered.
- Must have demonstrated experience in quantitative research.
- Experience/knowledge of modern psychometric methods and Item Response Theory desired .
- SAS or similar statistical programming experience required.

QualityMetric offers an excellent benefits package and competitive compensation.
