Call for Journal Book Review Editor

The Psychometric Society is seeking applications and nominations for the position of book review editor of its journal *Psychometrika*. *Psychometrika* is devoted to the development of psychology as a quantitative rational science, including the advancement of theory and methodology for behavioral data analysis in psychology, education, and the social and behavioral sciences generally. The journal is published four times a year, in March, June, September, and December, and contains articles on the development of quantitative models of psychological phenomena, as well as statistical methods and mathematical techniques for evaluating psychological and educational data. *Psychometrika* is currently produced and distributed by the Psychometric Society, via an arrangement with Springer Science+Business Media (formerly Springer-Verlag), New York.

The book review editor would serve a four-year term, beginning January 1, 2016 or earlier.

The book review editor is responsible for the following

- Identify newly released books on quantitative methods that would be of interest to readers of *Psychometrika* and reflect diverse topics.
- Obtain books to be reviewed by requesting them from the publisher. (Books are often sent by publishers for review consideration).
- Maintain a list of books available for review.
- Appoint individuals to review books. These may be individuals who volunteer or those solicited by the editor to review books.
- Ensure copies of the book are sent to the reviewer.
- Evaluate the review in regard to its content, accuracy, quality, and length.
- Oversee any revisions of the book review.

For more information on book reviews in *Psychometrika*, see [https://www.psychometricsociety.org/content/psychometrika-book-reviews](https://www.psychometricsociety.org/content/psychometrika-book-reviews)

Any queries can be sent to the current Book Review Editor Jee-Seon Kim at
